## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 10 and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

### ***Drawings***

The formal drawings filed on June 11, 2002 have been approved.

### ***Specification***

The specification is objected to because it lacks the customary U.S. patent headings, i.e., "Background of the Invention," "Brief Summary of the Invention," "Brief Description of the Drawings," etc.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Laswick et al (U.S. patent no. 5,520,170). The patent to Laswick et al discloses a pilot operated

Art Unit: 3753

demand valve comprising a main valve means (218) and pilot valve means comprising a lever (206) having a projection (204) and a pilot jet (202), see Figure 7A. A spring (208) biases the projection (204) normally downward, col. 9, lines 44-49. The demand valve can be connected to a facepiece, col. 4, lines 1-6.

### ***Allowable Subject Matter***

Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Jackson (U.S. patent no. 6,016,802) is cited for the additional showing of a breathing apparatus for a facepiece including a lever and a pilot jet.
